
Aromatase Inhibitors

provides a brief description and explains the differences between aromatase inhibitors

Axillary Lymph Nodes

explains the relationship between the axillary nodes and treatment of breast cancer

Benign Breast Changes

describes fibrocystic changes and other benign breast conditions and explains their relationships to breast cancer

Biopsy

discusses the role of biopsy in the diagnosis of breast cancer and explains the different types of biopsies

Breast Calcifications

explains the types of calcifications that may be seen on a mammogram

Breast Cancer Detection

explains the importance of early detection and specific methods of detection

Breast Cancer Facts

presents what is currently known about breast cancer

Breast Cancer in Men

provides an overview of breast cancer in men

Breast Cancer in Pregnancy

discusses common concerns and questions of many women and possible treatment options during pregnancy

Breast Cancer Risk Factors

identifies and describes known risk factors for breast cancer

Breast Health Resources

provides a list of places and ways to find more information on breast cancer

Breast Imaging Methods

explains the purpose and technical aspects of different breast imaging procedures

Breast Reconstruction & Prosthesis

discusses reconstruction options and the use of a breast prosthesis

Breast Surgery

presents types of breast cancer surgery and discusses the side effects from surgery

Carcinoma in Situ

defines carcinoma in situ (CIS) and describes appropriate treatments

Chemotherapy

discusses all aspects of chemotherapy, including the types and side effects

Chemotherapy – Coping With Side Effects

describes side effects associated with chemotherapy and discusses ways for managing them

Clinical Trials

describes the process through which drugs and treatments enter clinical trials and how one joins a clinical research trial

Complementary Therapies

describes various types of complementary therapies and ways to help decide their usefulness

Coping With a Cancer Diagnosis

presents an overview of the emotional aspects of a breast cancer diagnosis

Current Research On Drugs & Treatments

discusses and describes new areas of drug and treatment research

Diet & Nutrition During Treatment

provides important nutrition recommendations during breast cancer treatment and recovery

Ductal Carcinoma in Situ

defines ductal carcinoma in situ (DCIS) and describes appropriate treatments

End-of-life Care

discusses palliative care, hospice and quality of life after treatment is stopped

Follow-up

describes the next steps after breast cancer treatment is completed

Genetics & Breast Cancer

explains the relationship between genetic mutations and the development of breast cancer

Getting the Support You Need

discusses how to get the social support you need

Healthy Living

discusses the importance of leading a healthy lifestyle

Hormone Therapy

describes hormone therapy and the various classes of drugs used

How Hormones Affect Breast Cancer

explains and discusses the association between hormones and breast cancer tumor growth

If Breast Cancer Returns

discusses physical and emotional issues related to the recurrence of breast cancer

Inflammatory Breast Cancer

defines inflammatory breast cancer and discusses symptoms and treatment
